OWNER'S GUIDE

Running your shop app

Everything you do from the owner page: check sales, set the weekly drop, put items on sale, manage members and photos. Keep this by the register.

Shop app link _____

Owner page link _____

Set up by _____

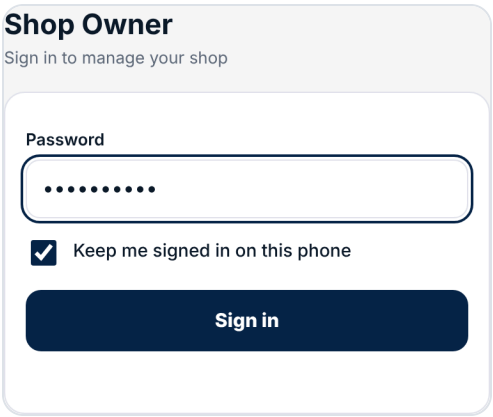

Write your links here. Your password isn't written anywhere; keep it to yourself.

Weekly checklist

1 Signing in

1. Open your **owner page link** on your phone or computer.
2. Type your password and tap **Sign in**.
3. Leave **Keep me signed in on this phone** ticked on your own phone so you don't have to type it every time. Untick it on a shared computer.

Tap **Sign out** at the top when you're done on a shared device. The moon/sun button switches between dark and light.

The sign-in screen

TIP
Add the owner page to your home screen so it opens like an app. iPhone: Share → Add to Home Screen. Android: ⋮ menu → Add to Home screen.

PASSWORD
Forgot it or want a new one? It's changed in Cloudflare (Worker → Settings → **ADMIN_PASSWORD**), so ask whoever set up your app. After a change, every phone has to sign in again.

2 Reading your sales

The **Sales** panel is the first thing you see. It reads your orders straight from Stripe, so there's nothing to type in. Pick **7**, **30** or **90 days** at the top.

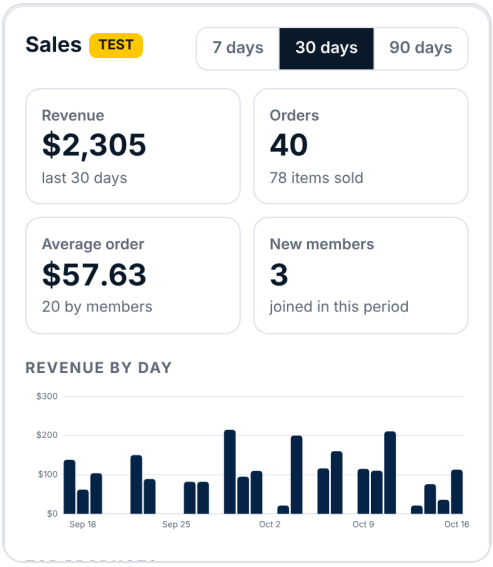

Revenue	Money taken from app orders in the period, including shipping.
Orders	Paid orders, and how many items they held.
Average order	Revenue ÷ orders. Underneath: how many orders came from members.
New members	People who joined in the period.
Revenue by day	One bar per day. Tap or hover a bar to see that day's total.
Top products	Best sellers by money taken, with how many sold.
At a glance	Pickup vs. shipped orders, checkouts started, and how many of those were finished (paid).

WHAT "CHECKOUTS FINISHED" TELLS YOU

If lots of people start checkout but few finish, something may be putting them off: shipping cost, price, or the payment page.

YELLOW TEST TAG

You're seeing practice orders from Stripe's test mode. Real orders appear once your real Stripe key is connected, and the tag goes away. Refunds made in Stripe aren't taken off these numbers; Stripe has the exact payout figures.

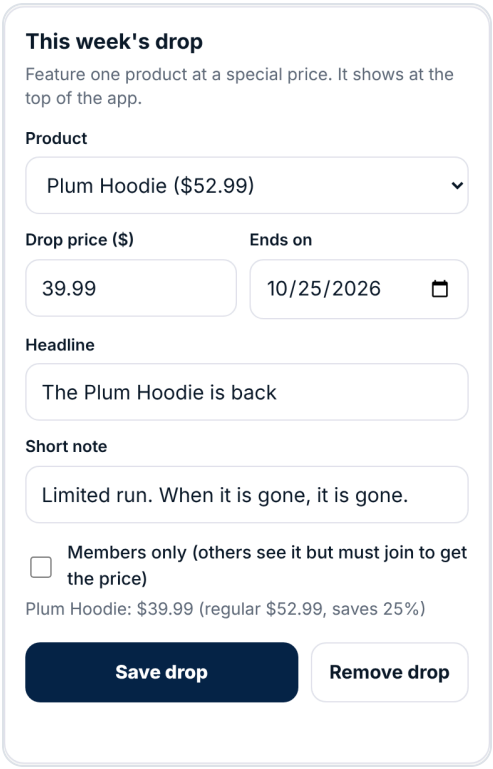

Sales panel (example numbers)

3 This week's drop

One product at a special price, shown in a banner at the top of the shop. It's your weekly reason for people to open the app.

1. Pick the **Product**.
2. Type the **Drop price**. It has to be lower than the regular price; the line under the form shows how much people save.
3. Choose **Ends on**. The drop disappears by itself after that day.
4. Add a short **Headline** and **Short note** (optional).
5. Tap **Save drop**. It's in the app straight away.

Members only: everyone sees the drop, but only members get the price. Great for getting sign-ups. **Remove drop** takes it down early.

Setting a drop

4 Sale prices

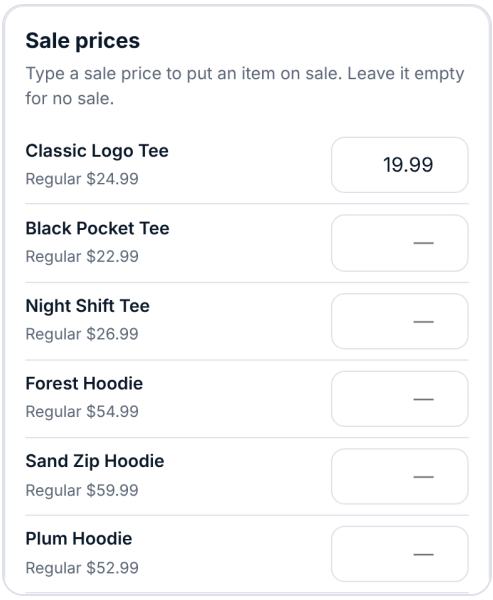

1. Find the item in the **Sale prices** list. Its regular price is shown under the name.
2. Type the sale price in its box. It must be lower than the regular price.
3. Tap **Save sale prices** at the bottom of the list.

To end one sale, clear its box and save. **End all sales** clears every box at once.

How prices are decided

A customer always pays the **single lowest price** they qualify for: regular, sale, drop or member price. Deals don't stack. The app works this out again at checkout, so nobody can change what they pay.

> **TIP**
> Regular prices and the product list are set up when the app is built. To add a product or change a regular price, ask whoever set up your app.

Classic Logo Tee on sale at $19.99

5 Members

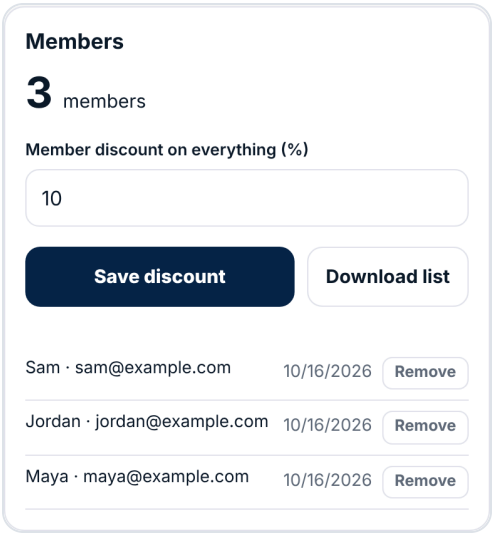

Customers join free from the **Members** tab in the app with their name and email (phone is optional).

- **Member discount**: type a percentage from 0 to 50 and tap **Save discount**. It applies to everything, but never stacks with sales or drops.
- The list shows everyone who joined, newest first.
- **Download list** saves a spreadsheet file (members.csv) with name, email, phone and join date. Open it in Excel, Numbers or Google Sheets, or load it into your email or text tool to announce a drop.

The discount only works when the email at checkout is on this list, so it can't be faked.

Someone asks to be deleted? Tap **Remove** next to their name, then tap **Sure?** to confirm. Then reply to let them know it's done.

> **PRIVACY**
> Your app has a **Privacy policy** page (linked in the app's Help tab, the join form and the cart) that promises shoppers you'll delete their info and stop messages when asked. Keep that promise: stop messaging anyone who asks, and remove anyone who asks to be deleted.

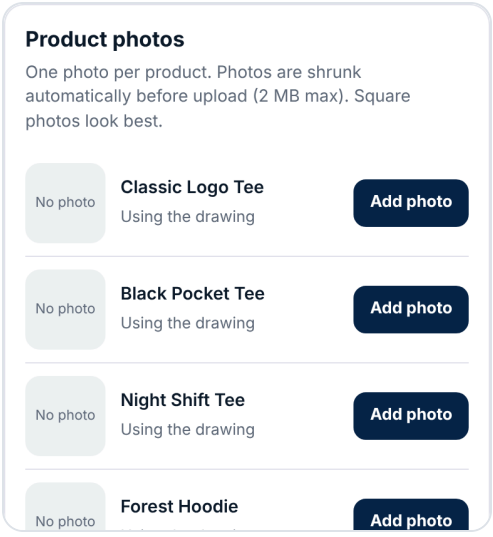

Members, discount and download

6 Product photos

1. Find the product in **Product photos**.
2. Tap **Add photo** (or **Change**) and pick a photo or take one.
3. It uploads by itself and shows in the app straight away.

- One photo per product. A new one replaces the old one.
- Photos are shrunk automatically. JPG, PNG or WebP; 2 MB max after shrinking.
- **Square photos look best.** Use a plain background and good light.
- **Remove** goes back to the built-in drawing. Tap it twice to confirm.

Add or change a product photo

7 Share the shop QR code

Every customer has a **Share the shop** card at the bottom of the app's **Members** tab. Friends scan the code with their phone camera to open your shop, or the customer taps **Share link** to send it by text.

Use it yourself, too:

- Open the app, go to Members, and screenshot the code to print for the counter, bags or flyers.
- Ask happy customers to share it with a friend while they're at the counter.

Shoppers also have a **Help** tab in the app that explains ordering, pickup, membership and rewards, so you can point them there.

What customers see

8 At the counter

SITUATION	WHAT TO DO
Pickup order	The customer shows **Order placed** and an order number in the app. Every order is also in Stripe → Payments, marked **PICKUP IN STORE** or **SHIP**, with what they bought and their phone number.
Shipping order	Stripe → Payments shows the shipping address. Pack it and ship it; the flat shipping fee is already included.
Reward claim	The customer opens the **Rewards** tab showing a full card. Hand over the reward, then tap **Staff: mark as claimed** twice on *their* phone. That starts a new card.
"Where's my member price?"	They need to check out with the same email they joined with. On a new phone they just join again with that email.
Email receipts	Turn on once in Stripe: Settings → Business → Customer emails → **Successful payments**.

9 When something looks wrong

YOU SEE	TRY THIS
Wrong password	Check caps lock and try again (it pauses one second after a wrong try). Still stuck? The password is changed in Cloudflare by whoever set up the app.
A change isn't showing	Pull down to refresh the shop, or close and reopen it.
"Photo is too large"	Take a new photo or crop it, then try again.
"Drop price must be below..."	Drop and sale prices have to be lower than the regular price shown.
Sales shows TEST	Your app is still connected to Stripe's test mode. No real money is moving.
Customers can't check out	Write down the exact message they see and contact whoever set up your app.

Weekly checklist

- [ ] Glance at **Sales** (7 days). What sold, and did checkouts finish?
- [ ] Set next week's **drop** with an end date.
- [ ] Update or end any **sales**.
- [ ] Add **photos** for anything new or still showing a drawing.
- [ ] **Download the member list** and announce the drop.
- [ ] Check Stripe → Payments for pickup and shipping orders to prepare.
